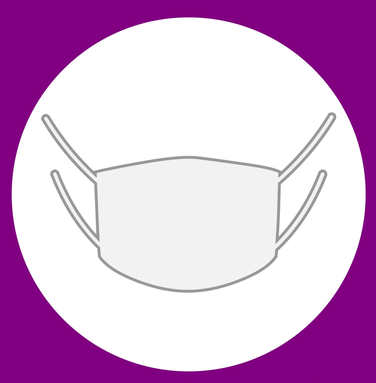
HOW TO PUT ON, STORE, AND REMOVE YOUR AIR QUEEN AND AIRBON KIDS NANO MASK SAFELY

HOW TO PUT ON YOUR MASK

Clean your hands before touching the mask



Inspect the mask to see if it is damaged, dirty, or wet.

Position the mask so that your nose, mouth and chin are covered. Pull the ear loops on. Press down on the wire nose support so that it contours to your face.

Make sure the mask is not loose or has gaps. If it does, consider using a mask clip or extender to lessen the gaps.

HOW TO REMOVE AND STORE YOUR MASK

Clean your hands before removing the mask

Remove the mask by pulling the ear loops off your ears. If you have a mask clip or extender, unclip one side first and then remove the mask by the ear loops.

For short-term storage and then reuse of your mask, please place it in a breathable container, like a brown paper bag, or a mask case.

To reuse your mask after short-term storage, be sure to remove it by the straps when taking it out of the bag. Follow the steps above on how to put on your mask. Clean your hands after handling the mask.

If you are done with your mask for the day, store it in a container until you are ready to disinfect the mask. Clean your hands after handling the mask.

To disinfect your mask:

(1) handwash with soap and water
(2) use a UV light sanitizer,
(3) spray with 75% ethanol
(4) leave out for 7 days, and/or
(5) use an antibacterial mask case.

(See FAQ section on www.gogadeedee.com for more details.)

DON'TS
